

## EXCHANGE NOTICE 2-2024 - Changes to the Rulebook:

- Introduction of connection via API for third party systems (ISV)
- Introduction of automatching

## Announcement date: 29 November 2024 Effective date: 01 January 2025

## Summary:

NOREXECO has, after market demand, decided to allow API based electronic access to our Electronic Trading System (ETS). By this change, the ETS of NOREXECO can be accessed by users of approved third party systems (ISVs).

An automatching function has been added to the ETS. Every incoming Order will be validated against pre-trade limits and eventually matched with Resting Orders that meet the criteria of the incoming Order. An unmatched order will eventually be placed in the Order book according to its priority and Order criteria.

The changes mainly affects Rulebook chapters

- 4 Trade Membership Requirements,
- 7 General Trading Rules and
- 8 Electronic Trading System

The current version of the Rulebook is 4.1, the amended Rulebook is 4.2.

On our <u>web page</u> you will find this Exchange Notice 2-2024, a 4.2 version with revision marks vs 4.1 and a clean version of 4.2.
